

Vortek Surgical is pleased to offer this upcoming Continuing Education opportunity for GI and Endoscopy Nursing Professionals:

“Advancing the Scope of Infection Control in GI Endoscopy”

Endoscopic GI procedures have seen significant advancements in the technology available when performing these potentially life saving procedures. Whether performed as a screening or diagnostic tool, these procedures pose unique infection control challenges and risks due to the direct contact and generation of enteric (GI) bacteria, bloodborne pathogens, and OPIM that are a predictable by-product of GI endoscopy.

Attendees of this educational presentation, which is specifically geared toward GI endoscopy, will develop an enhanced and practical understanding of the infection control principles as they pertain to the activities they perform and patients they see every day. Upon gaining this awareness, GI endoscopy professionals will be able to apply these principles to identify and eliminate any “gaps” or weaknesses in current process that can negatively impact the safety of patients, staff, or a facility.

Presented By: Tom Szymczak, PT

Continuing Education Credit: 1.0 (One) Contact hour (GI Specific) will be provided for attendees upon completion

Learning Objectives: Upon completion of this course, attendees will be able to:

- Apply principles of Infection Control to the unique risks in GI endoscopy
- Discuss current Guidelines and recommendations as they relate to activities performed within GI endoscopy departments
- Identify “gaps” and infection control weaknesses through the performance of a process flow risk analysis
- Integrate enhanced infection prevention awareness through the development of procedures and strategies to ensure safety and maintain a hygienic and safe procedure area

Date: Saturday October 21, 2017

Time: 5:30 PM (1 Hour)

Location: Drury Plaza Hotel Indianapolis/Carmel
2017 Multi-Region SGNA Conference Room
9625 North Meridian St
Indianapolis, IN 46290
